THE STORY

Office Revolution is Teknion's premier furniture dealer in Chicago. Having recently acquired another two other dealerships, Office Revolution was ready to firmly establish their new brand with a space that reflected the firm's commitment to high-quality design.

Their new workplace presents a forward-looking organization that is a strong partner for design firms and their clients while providing an efficient, ergonomic and comfortable workplace for their staff. The open environment makes it a great space for staff to work collaboratively, while the height adjustable desk and small meeting rooms provide privacy for heads-down work. Reclaimed wood wall panning and a custom live edge harvest table bring the outdoors in and add bold organic texture and shape to the space.
