THE STORY

As a leading real estate developer, Crawford Hoying is known for exceptional developments that create community, and Bridge Park is no exception. Located in the heart of Dublin, Ohio, Bridge Park is a community built on the idea that what matters most is not only where people live, but how they live. The community is a unique blend of commercial, residential, retail and entertainment facilities with its own distinctive character.

When it came to furnishing their new leasing office, Crawford Hoying reached out to Office Revolution, who has been a long-time partner of theirs. Together with M+A architects, Office Revolution set out to furnish an elegant, inviting office that reflects the quality of the development.

Potential tenants will get a feel for the beautiful, state-of-the-art community that Crawford Hoying has to offer when they step into the leasing office. The space is styled with a neutral color scheme and a multitude of soft furnishings to create a warm, welcoming atmosphere. Within the open floor plan, several different seating options were utilized, including a Margot Sofa in Velvet Midnight along with smaller, more intimate seating areas.

This space will have potential tenants picturing themselves in this stunning development, and we're thrilled to have partnered with Crawford Hoying on another remarkable location.
