GENERAL CONTRACTOR & PROJECT MANAGEMENT FIRM

Choate Construction

MANUFACTURING PARTNERS

Teknion

THE STORY

Choate Construction, one of the largest general contractors in the Southeast, specializes in preconstruction, design-build, LEED programming/implementation and construction services. They needed a solution to enhance their space and add more privacy for individual work areas and client meetings. With a mission to provide unparalleled quality and service to produce optimal facilities solutions, they were looking for a partner with the same objective.

Through an existing relationship, Office Revolution was brought in to present a mock-up of the newly imagined space and was awarded the project due to our vision and strong relationships in the market. We installed Teknion Altos and Tek Vue wall systems to create private spaces to meet with clients and reduce sound between meeting rooms. Full glass-front offices allow the natural light to flood in and keep the office feeling open, while also allowing for privacy. Built for the evolving world of interior architecture, these clean-lined glass walls are designed to harmonize with building interiors for a seamless integration.

WHAT THEY SAY

"[We] looked at many options on how best to renovate our existing offices...we wanted to emphasize our employee-owners as well as technology with each design decision. We also wanted to make smart investments in construction to make sure that we created an office environment to expand and retain the best talent.

...Immediately, Office Revolution partnered up with Choate to provide a perfect solution to our tight timeline. During this strange time of material shortages and supply chain restraints, our Teknion materials were delivered right on our original timeline and installed in a week's time. The quality of the product, appearance, and sound attenuation performance has exceeded all expectations...[We] are super proud of our new space."

James E. Baker
Assoc. AIA Project Executive,
Choate Interior Construction Company
