THE STORY

Baker McKenzie is a leading global law firm with its founding office located in the heart of downtown Chicago. Occupying the top eight floors of the Blue Cross Blue Shield Building, their new office offers expansive views overlooking Lake Michigan and Millennium Park.

As part of their sustainable initiative, over one mile of Teknion glass demountable walls were installed to maximize daylight and views for staff of all levels. With their emphasis on sustainable design, this new state of the art facility has received LEED CI Gold Certification.
