THE STORY

Oak Street Health is an innovative network of primary care clinics in Chicago. With a focus on simple quality healthcare, exclusively for Medicare recipients, their patients receive unlimited access to premier medical care. Patients can also enjoy a variety of community events and educational offerings, all at no additional cost. Office Revolution teamed with OKW Architects to provide a bright, welcoming and communal environment that felt open and easily accessible to the public. Our internal design and project management teams selected furniture product to suit the specific aesthetic, function and budget required by Oak Street Health.
