THE STORY

St. Joseph's Hospital is an award winning and nationally ranked hospital that combines the convenience and caring experience of a community hospital with the technology and expertise of a major academic medical center. The hospital recently renovated their space and reached out to Office Revolution to create a standardized furniture program for their ER. The team's challenge was to specify furniture based on durability and clean-ability while maintaining an upscale aesthetic. The project scope included furniture for private offices, waiting areas, exam rooms, and seating for nurses' stations.
