## THE STORY

Royal Oaks Inspirata Pointe is a nonprofit Life Plan Community situated in Sun City, AZ. With a vision to continue to embrace innovative developments in senior living, the organization is committed to cultivating a vibrant and enriching lifestyle for its residents. With a focus on resident well-being, Royal Oaks provides an extensive array of engaging activities, inspiring experiences, and holistic living approaches.

Perkins Eastman sought out Living Revolution as a trusted partner for their day two services, knowing they could rely on our precision, promptness, and commitment to follow through. With an eye for style and elegance, our team carefully curated a selection of products from renowned brands. Complementing this selection, Custom Crafters, our sister company, created a custom 108" Caesarstone Table with two circular White Oak bases and a custom console with bookshelves.

At Inspirata Pointe, the outdoor spaces are just as remarkable as the living residences. These beautiful spaces were meticulously designed to offer a multitude of benefits, including relaxation, leisure activities, physical fitness opportunities, and socializing.

Amenities at Inspirata Pointe include:

- Bocce ball court
- Dog park
- Walking and bike paths
- Outdoor and indoor pool
- Life enrichment center and auditorium
- Fitness areas
- Art studio
- Woodworking shop
- Classroom spaces
- 50+ acres of manicured grounds, plantings, trees, and gardens
- Various inviting dining choices

These beautiful spaces serve as an invitation for residents to come together, engage with one another, and create a vibrant, thriving community.

## WHAT THEY SAY

“The Living Revolution team is the best of the best! It is like a breath of fresh air working with this team. They are a wonderful partner, always looking out for us and our client’s best interest. They not only provide top notch service, but they actually care. They focus on the details of each and every piece, checking to make sure everything will function and meet the expectations of the end user. Every aspect of the process is met with the same attention from starting the proposal, working through the budget, tracking the orders and finally the installation. The entire process has been smooth from start to finish, and it allows us to focus on the other aspects of the project, knowing we are in good hands. They are truly an extension of our team, and we absolutely love working with them.”
